The focus is on the communication needs of people who have autism and severe learning difficulties who have not yet achieved use nor perhaps understanding of speech and may be "difficult to reach" in various ways. However there will be discussion of the needs of people with ASD who have achieved some speech. Intensive Interaction is an approach where the member of staff is seen as the main teaching resource, using personal qualities of face, voice and body language to involve the learner in progressive sequences of interactive activities. These activities provide the person with learning difficulties with the opportunity to learn the pre-speech fundamentals of communication such as enjoying being with another person, giving sustained attention, turn-taking, use and understanding of eye contacts, facial expressions, body language and non-verbal signalling.

The course will include extensive use of video examples. Comprehensive hand-outs will be given. Course members should expect to work in a warm, humorous and supportive atmosphere.
